SecureAcademy
Official PAN-EDU-311 training:
Advanced Firewall Troubleshooting

Course Summary

PAN-EDU-311 Advanced Firewall Troubleshooting is the next-level follow-on course to the Palo Alto Extended Firewall Management (PAN-EDU-205) and the Palo Alto Network's Installation, Configuration, and Management (PAN-EDU-201). It is therefore recommended that you follow these trainings before participating in the PAN-EDU-311 training.

During this three-day, instructor-led course, you will get, besides a lot of theoretical explanation also many practical assignments with the aim of solving security, networking, threat prevention, logging and reporting features of the Palo Alto Networks Operating System.

Scope

- Course level: Advanced +
- Course duration: 3 Days
- Course format: Instructor-led hands-on Troubleshooting scenarios
- Platform support: PA-500 through PA-5000 series
